

A blurred, motion-captured image of a bar interior. The background features a wall with a wavy, metallic texture, illuminated by warm, golden light. In the foreground, various bottles of alcohol and beer taps are visible, though they are out of focus due to the motion blur effect. The overall atmosphere is dynamic and vibrant.

| Fuel type: | Diethylene glycol | Pack Size: | 24 cans per carton |

Uro Fuel Wick is not classed as DG making it safer to handle as the can does not get hot whilst lit and is reusable with its easy twist on cap.

Sure Shot - 15ml/30ml Measured Pourers

Sure Shot 3 Ball Liquor Pour spouts are the most accurate, most durable, most reliable measured pour spouts available. Available in a range of colours and without or with collar.

Sure Shot spouts feature numerous patented innovations, among them are:

1. A valve alongside the main cylinder to prevent after-drip and eliminate waste.
2. A primer ring to channel liquor around the inner ball bearing for a more accurate pour.
3. Three ball bearings, rather than the old standard two, for a smoother, more accurate pour.
4. A base design that ensures that the ball bearings will never fall into the bottle.

Sure Shot - Free Pours

Sure Shot non-measured pour spouts are the most durable spouts available. Also, no other pour spout fits more bottle openings or is as easy to remove from a bottle.

The Sure Shot free pour spouts feature top-quality construction and materials. This makes Sure Shot free pour spouts among the most durable spouts available. Also, no other pour spout fits more bottle openings or is as easy to remove from a bottle.

Sure Shot - 15ml/30ml Measured Chrome Pourer

We've got BALLS! Three to be exact! The Sure Shot team understand trend, and we've responded with a pretty ballsy move of our own... we introduce the NEW! **Sure Shot Chrome Pourer...**

This is a world first "Measured Chrome Pourer" and has a world patent to go with it.

Unlike old style pours which haven't changed much in more than twenty years, our pours are the result of extensive redesign, including a unique ball bearing assembly which utilizes a third ball for unprecedented accuracy.

Remember, our competitors simply haven't got enough balls!

Sure Shot - 148ml Measured Wine Pourer

So whats the difference? Apart from the ml's it pours, it works just like our traditional liquor pourers. Accurate, durable and reliable. This pourer suits both red and white wine. Some older red wines with heavy sediment may require the pourer to be rinsed clean when necessary.

Sure Shot - Wine Aerator

Sure Shot Wine Aerator aerates wine in the spout. The patented double aeration technology injects just the right amount of air into each glass of wine whilst pouring (over 30 bubbles per second).

LUMEA®

Liquid Wax Candles

Choose Lumea's Liquid Wax Candles and lamps for the perfect ambient lighting in your restaurant, hotel, bar or spa and you will notice the difference immediately! Lumea Liquid Wax Candles are quick and easy to use saving you time and money

Wax Candles

Lumea manufactures and supplies tealight and nightlight wax candles conveniently packaged for restaurants, hotels and bars.

LED Candles

Lumea Flicker Candles can be recharged and reused over and over again. Each candle has a lifetime of up to 6,000 hours!

The LED ensures bright and consistent illumination throughout the lifetime of the candle and inductive technology makes the candles easy to charge. Use the remote control to switch all the Flicker Candles on and off, adjust the brightness and select either static or flickering light effect.

Lumea Flicker Candles are designed to be used in many of Lumea's range of Candle Lamps - look out for the icon to see which lamps are suitable.
